Show Me God

—What the Message from Space Is Telling Us About God

by Fred Heeren / Day Star Publications

Show Me God brings together the great cosmologists of our time to talk about their discoveries—and the implications about God. In exclusive interviews, Stephen Hawking, George Smoot, Alan Guth, Arno Penzias and others speak of how their discoveries affect life's big questions: creation, the fine-tuning of the universe, why we're here, and the nature of God.

Getting as close to the discoveries as possible, Fred Heeren interviews Nobel prize-winning astrophysicists, NASA team leaders, and top theoretical physicists to explore life's big questions. Heeren uses humor, dialogues, and a multi-media format to examine the issues; he also tells the stories of how the major discoveries were made.

Fred Heeren has written for Nature, Scientific American, New Scientist, The Smithsonian, The Boston Globe, The New York Times, The Wall Street Journal, and The Washington Post.

Show Me God explores:

- The search for extraterrestrial intelligence, and the likelihood of contact
- The origins of everything: God and non-god explanations
- The discoveries and evidence leading to the Big Bang theory
- Christian faith and the Big Bang
- Fine-tuning and alternative explanations for its appearance
- Is the gospel logical?
- The healthy skeptic
- The origins of science
- Q&A with leading cosmologists
- A little science fiction between the science facts

“Brings the latest space results down to Earth—a story well told.”

—John Mather, Ph.D., COBE satellite chief scientist, co-winner of 2006 Nobel Prize in Physics for discovery of blackbody form of the microwave background radiation
