Green Networking and Communications: ICT for Sustainability

Green Networking and Communications: ICT for Sustainability

Although the information and communication technology (ICT) industry accounted for only 2 percent of global greenhouse gas emissions in 2007, the explosive increase in data traffic brought about by a rapidly growing user base of more than a billion wireless subscribers is expected to nearly double that number by 2020. **It is clear that now is the time to rethink how we design and build our networks.**

Green Networking and Communications: ICT for Sustainability brings together leading academic and industrial researchers from around the world to discuss emerging developments in energy-efficient networking and communications. It covers the spectrum of research subjects, including methodologies and architectures for energy efficiency, energy-efficient protocols and networks, energy management, smart grid communications, and communication technologies for green solutions.

- Examines foraging-inspired radio-communication energy management for green multi-radio networks
- Considers a cross-layer approach to the design of energy-efficient wireless access networks
- Investigates the interplay between cooperative device-to-device communications and green LTE cellular networks
- Considers smart grid energy procurement for green LTE cellular networks
- Details smart grid networking protocols and standards

Considering the spectrum of energy-efficient network components and approaches for reducing power consumption, the book is organized into three sections: Energy Efficiency and Management in Wireless Networks, Cellular Networks, and Smart Grids. It addresses many open research challenges regarding energy efficiency for IT and for wireless sensor networks, including mobile and wireless access networks, broadband access networks, home networks, vehicular networks, intelligent future wireless networks, and smart grids. It also examines emerging standards for energy-efficient protocols.

Since ICT technologies touch on nearly all sectors of the economy, the concepts presented in this text offer you the opportunity to make a substantial contribution to the reduction of global greenhouse gas emissions.

From reader reviews:

Diane Gonzales:

Inside other case, little folks like to read book Green Networking and Communications: ICT for Sustainability. You can choose the best book if you appreciate reading a book. As long as we know about how is important the book Green Networking and Communications: ICT for Sustainability. You can add information and of course you can around the world with a book. Absolutely right, simply because from book you can recognize everything! From your country right up until foreign or abroad you will end up known. About simple thing until wonderful thing you could know that. In this era, you can open a book or perhaps searching by internet gadget. It is called e-book. You can use it when you feel bored stiff to go to the library. Let's read.

Candice Foushee:

The book Green Networking and Communications: ICT for Sustainability gives you the sense of being enjoy for your spare time. You can utilize to make your capable a lot more increase. Book can to become your best friend when you getting strain or having big problem using your subject. If you can make studying a book Green Networking and Communications: ICT for Sustainability to be your habit, you can get considerably more advantages, like add your own capable, increase your knowledge about some or all subjects. You are able to know everything if you like open and read a book Green Networking and Communications: ICT for Sustainability. Kinds of book are several. It means that, science reserve or encyclopedia or other individuals. So , how do you think about this guide?

Rita Merritt:

Reading a publication tends to be new life style in this era globalization. With reading you can get a lot of information that may give you benefit in your life. Along with book everyone in this world could share their idea. Books can also inspire a lot of people. Many author can inspire their particular reader with their story or maybe their experience. Not only situation that share in the guides. But also they write about the knowledge about something that you need case in point. How to get the good score toefl, or how to teach your kids, there are many kinds of book that you can get now. The authors these days always try to improve their expertise in writing, they also doing some study before they write with their book. One of them is this Green Networking and Communications: ICT for Sustainability.

Robert McCauley:

In this time globalization it is important to someone to obtain information. The information will make anyone to understand the condition of the world. The health of the world makes the information simpler to share. You can find a lot of referrals to get information example: internet, newspaper, book, and soon. You can view that now, a lot of publisher that print many kinds of book. Often the book that recommended to you is Green Networking and Communications: ICT for Sustainability this reserve consist a lot of the information from the condition of this world now. This book was represented how do the world has grown

up. The terminology styles that writer use for explain it is easy to understand. The writer made some investigation when he makes this book. Here is why this book suited all of you.
