Petra Kopf-Maier

Wolf-Heidegger's "Atlas of Human Anatomy", revised, updated and modernized completely by Prof. Dr. med. Petra Kopf-Maier, appears new in two volumes. This 5th edition of this classic of anatomy is the result of intensive collaboration between recognized scientists, dissectors and graphic artists. The high-class illustrative material, one of the main features of the standard atlas, has been printed in color throughout and extended by providing a large amount of anatomical sections, x-ray plates, computerized tomograms and magnetic resonance images as well as ultrasound pictures. This has been done taking the enormous clinical importance of modern imaging techniques into consideration. Placing the respective anatomical sections and radiologic images directly opposite each other should facilitate the interpretation of CT and MRI scans and open new approaches to a better understanding.
