Mechanical Engineering Design (McGraw-Hill Mechanical Engineering)

Charles Mischke, Joseph Shigley

Mechanical Engineering Design (McGraw-Hill Mechanical Engineering) Charles Mischke, Joseph Shigley

The seventh edition of Mechanical Engineering Design marks a return to the basic approaches that have made this book the standard in machine design for over 40 years. At the same time, the textbook has been significantly updated and modernized for today's engineering students and professional engineers.

Working from extensive market research and reviews of the 6/e, the new 7/e features reduced coverage of uncertainty and statistical methods. Statistics is now treated (in chapter 2) as one of several methods available to design engineers, and statistical applications are no longer integrated throughout the text, examples and problem sets.

Other major changes include updated coverage of the design process, streamlined coverage of statistics, a more practical overview of materials and materials selection (moved to chapter 3), revised coverage of failure and fatigue, and review of basic strength of materials topics to make a clearer link with prerequisite courses.

Overall coverage of basic concepts has been made more clear and concise, with some advanced topics deleted, so that readers can easily navigate key topics. Problem sets have been improved, with new problems added to help students progressively work through them.

The book has an Online Learning Center with several powerful components: MATLAB for Machine Design (featuring highly visual MATLAB simulations and accompanying source code); the "FEPC" finite element program, with accompanying Finite Element Primer and FEM Tutorials; interactive FE Exam questions for Machine Design; and Machine Design Tutorials for study of key concepts from Parts I and II of the text. Complete Problem Solutions and PowerPoint slides of book illustrations are available for instructors, under password protection. A printed Instructor's Solutions Manual is also available, with detailed solutions to all chapter problems.

From reader reviews:

Barbara Kimmel:

Are you kind of active person, only have 10 or 15 minute in your day to upgrading your mind ability or thinking skill perhaps analytical thinking? Then you are having problem with the book in comparison with can satisfy your short space of time to read it because this all time you only find book that need more time to be learn. Mechanical Engineering Design (McGraw-Hill Mechanical Engineering) can be your answer because it can be read by an individual who have those short free time problems.

Bradford Padgett:

This Mechanical Engineering Design (McGraw-Hill Mechanical Engineering) is completely new way for you who has fascination to look for some information given it relief your hunger info. Getting deeper you into it getting knowledge more you know otherwise you who still having little digest in reading this Mechanical Engineering Design (McGraw-Hill Mechanical Engineering) can be the light food for you personally because the information inside this particular book is easy to get simply by anyone. These books produce itself in the form that is reachable by anyone, that's why I mean in the e-book application form. People who think that in publication form make them feel sleepy even dizzy this publication is the answer. So there is no in reading a publication especially this one. You can find actually looking for. It should be here for an individual. So , don't miss this! Just read this e-book style for your better life in addition to knowledge.

John Damm:

As a scholar exactly feel bored to reading. If their teacher questioned them to go to the library as well as to make summary for some guide, they are complained. Just very little students that has reading's heart and soul or real their hobby. They just do what the instructor want, like asked to the library. They go to right now there but nothing reading very seriously. Any students feel that reading is not important, boring in addition to can't see colorful pictures on there. Yeah, it is to be complicated. Book is very important for yourself. As we know that on this period of time, many ways to get whatever we would like. Likewise word says, ways to reach Chinese's country. So , this Mechanical Engineering Design (McGraw-Hill Mechanical Engineering) can make you truly feel more interested to read.

Christina Bishop:

Reading a publication make you to get more knowledge as a result. You can take knowledge and information originating from a book. Book is created or printed or descriptive from each source in which filled update of news. With this modern era like currently, many ways to get information are available for you. From media social such as newspaper, magazines, science reserve, encyclopedia, reference book, story and comic. You can add your understanding by that book. Do you want to spend your spare time to spread out your book? Or just seeking the Mechanical Engineering Design (McGraw-Hill Mechanical Engineering) when you required

it?
