Math You Can Play Combo: Number Games for Young Learners Denise Gaskins

Math Your Kids WANT to Do

Math You Can Play Combo features two books in one, with 42 kid-tested games that offer a variety of challenges for preschool and school-age learners. Young children can play with counting and number recognition, explore place value, build number sense, and begin learning the basics of addition. School-age kids can develop mental flexibility by playing with numbers, from basic math facts to the hundreds and beyond.

Math games pump up mental muscle, reduce the fear of failure, and generate a positive attitude toward mathematics. Logic games build strategic thinking skills, and dice games give students hands-on experience with probability. Through playful interaction, games strengthen a child's intuitive understanding of numbers and build problem-solving strategies. Mastering a math game can be hard work, but kids do it willingly because it is fun.

If you are a parent, these games provide opportunities to enjoy quality time with your children. If you are a classroom teacher, use the games as warm-ups and learning center activities or for a relaxing review day at the end of a term. If you are a tutor or homeschooler, make games a regular feature in your lesson plans to build your students' mental math skills.

So what are you waiting for? Clear off a table, grab a deck of cards, and let's play some math!
