**Computer-Aided Vaccine Design (Woodhead Publishing Series in Biomedicine)** Joo Chuan Tong, Shoba Ranganathan

Computational pre-screening of antigens is now routinely applied to the discovery of vaccine candidates.

Computer-aided vaccine design is a comprehensive introduction to this exciting field of study. The book is intended to be a textbook for researchers and for courses in bioinformatics, as well as a laboratory reference guide. It is written mainly for biologists who want to understand the current methods of computer-aided vaccine design. The contents are designed to help biologists appreciate the underlying concepts and algorithms used, as well as limitations of the methods and strategies for their use. Chapters include: MHC and T cell responses; Immunoglobulins and B cell responses; Scientific publications and databases; Database design; Computational T cell vaccine design; Computational B cell vaccine design; infectious disease informatics; Vaccine safety and quality assessments; and Vaccine adjuvant informatics.

- Essential reading for any biologist who wants to understand methods of computer-aided vaccine design
- Description of available data sources and publicly available software, with detailed analysis of strengths and weaknesses
- Theoretical concepts and practical examples of database design and development for a virtual screening campaign

### **From reader reviews:**

#### **Tatum Martin:**

What do you think about book? It is just for students because they are still students or the item for all people in the world, exactly what the best subject for that? Merely you can be answered for that query above. Every person has distinct personality and hobby per other. Don't to be pushed someone or something that they don't wish do that. You must know how great along with important the book Computer-Aided Vaccine Design (Woodhead Publishing Series in Biomedicine). All type of book is it possible to see on many options. You can look for the internet options or other social media.

#### **Nathan Lawhorn:**

The particular book Computer-Aided Vaccine Design (Woodhead Publishing Series in Biomedicine) has a lot of information on it. So when you make sure to read this book you can get a lot of benefit. The book was published by the very famous author. This articles author makes some research ahead of write this book. That book very easy to read you may get the point easily after scanning this book.

#### **Crystal Freeman:**

Playing with family in a park, coming to see the ocean world or hanging out with close friends is thing that usually you could have done when you have spare time, subsequently why you don't try point that really opposite from that. A single activity that make you not feeling tired but still relaxing, trilling like on roller coaster you have been ride on and with addition info. Even you love Computer-Aided Vaccine Design (Woodhead Publishing Series in Biomedicine), you may enjoy both. It is excellent combination right, you still would like to miss it? What kind of hang type is it? Oh can happen its mind hangout folks. What? Still don't get it, oh come on its called reading friends.

#### **Lou Bryant:**

What is your hobby? Have you heard which question when you got scholars? We believe that that query was given by teacher to their students. Many kinds of hobby, Every person has different hobby. And you know that little person like reading or as examining become their hobby. You should know that reading is very important along with book as to be the thing. Book is important thing to incorporate you knowledge, except your own teacher or lecturer. You will find good news or update in relation to something by book. Amount types of books that can you choose to use be your object. One of them is niagra Computer-Aided Vaccine Design (Woodhead Publishing Series in Biomedicine).
