Field Manual FM 3-07 Stability Operations with Change 1 18March2013 United States Government US Army

Field Manual (FM) 3-07 is the Army's keystone doctrinal publication for stability operations. FM 3-07 presents overarching doctrinal guidance and direction for conducting stability operations, setting the foundation for developing other fundamentals and tactics, techniques, and procedures detailed in subordinate field manuals. It also provides operational guidance for commanders and trainers at all echelons and forms the foundation for Army Training System curricula.

The six chapters that make up this edition of Stability Operations constitute the Army's approach to the conduct of full spectrum operations in any environment across the spectrum of conflict. This doctrine focuses on achieving unity of effort through a comprehensive approach to stability operations, but remains consistent with, and supports the execution of, a broader "whole of government" approach as defined by the United States Government (USG). The core of this doctrine includes the following:

- + Chapter 1 is rescinded.
- + Chapter 2 is rescinded.
- Chapter 3 addresses the essential stability tasks that comprise military stability operations. It provides a detailed discussion of each of the five primary stability tasks, and describes the subordinate tasks that constitute the range of activities in stability operations. It includes doctrine that describes the role of civil affairs forces in stability operations as the commander's conduit for civil-military integration. Finally, it describes development of mission-essential and directed task list development to support stability operations.
- + Chapter 4 is rescinded.
- Chapter 5 addresses transitional military authority and provides doctrine concerning command responsibility, establishment, and organization of military government to support stability operations. It includes principles for establishing judicial structures to enable transitional military authority.
- Chapter 6 provides the doctrinal foundation for security sector reform, and introduces security force assistance as the capacity-building activity that encompasses organizing, training, equipping, rebuilding, and advising host-nation security forces. It also sets disarmament, demobilization, and reintegration as a fundamental element of security sector reform.

Seven appendixes complement the body of the manual.

Army doctrine is consistent and compatible with joint doctrine. FM 3-07 links stability operations doctrine to joint operations doctrine as expressed in joint doctrinal publications, specifically, Joint Publication (JP) 3-0 and JP 5-0. FM 3-07 expands on the fundamental principles of operations expressed in ADP 3-0 and links those principles to a comprehensive approach to stability operations within the framework of full spectrum operations. FM 3-07 also uses text and concepts developed in conjunction with North Atlantic Treaty Organization partners.

The principal audience for FM 3-07 is the middle and senior leadership of the Army, officers in the rank of major and above, who command Army forces or serve on the staffs that support those commanders. It is just as applicable to the civilian leadership of the Army. This manual is also intended to serve as a resource for the other government agencies, intergovernmental organizations, agencies of other governments, international organizations, nongovernmental organizations, and private sector entities who seek to develop a

better understanding of the role of the military in broader reconstruction and stabilization efforts.
