Bioprocessing for Value-Added Products from Renewable Resources: New Technologies and Applications

Bioprocessing for Value-Added Products from Renewable Resources: New Technologies and Applications

Bioprocessing for Value-Added Products from Renewable Resources provides a timely review of new and unconventional techniques to manufacture high-value products based on simple biological material. The current source for most chemicals and materials is petroleum. Anticipation of its limited future availability, along with record high prices has spurred interest in alternatives that will be both sustainable and cost-effective.

In a very structured way this book begins by describing the modern technologies that form the basis for creating a bio-based industry. Next it lists the various organisms that are suitable for bioprocessing -from bacteria to algae- and it gives their unique characteristics. These first two parts set the stage for a variety of novel, experimental bioprocesses, such as the production of medicinal chemicals, the production of chiral compounds and the design of biofuel cells. Concludes with examples where biological, renewable resources become an important feedstock for large-scale industrial production.

Bioprocessing for Value-Added Products from Renewable Resources provides a unique perspective of the industry and the field and serves as an important guide towards the future. The book is suitable for researchers, practitioners, students, and consultants in the bioprocess and biotechnology fields.

- Reviews the principles underpinning modern industrial biotechnology
- Provides a unique collection of novel bioprocesses for a sustainable future
- Gives examples of economical use of renewable resources as feedstocks
- Suitable for both non-experts and experts in the bioproduct industry

From reader reviews:

Ruth McMillian:

In this 21st one hundred year, people become competitive in each way. By being competitive at this point, people have to do something to make all of them survive, being in the middle of often the crowded place and notice simply by surrounding. One thing that sometimes many people have underestimated is that for a while is reading. Yep, by reading a e-book your ability to survive increases then having a chance to stay than other is high. To suit your needs who want to start reading a book, we give you this specific Bioprocessing for Value-Added Products from Renewable Resources: New Technologies and Applications book as a beginner and daily reading book. Why, because this book is usually more than just a book.

Christy McCurry:

The e-book with title Bioprocessing for Value-Added Products from Renewable Resources: New Technologies and Applications contains a lot of information that you can find out it. You can get a lot of benefit after reading this book. This book exists new knowledge the information that exists in this book represented the condition of the world at this point. That is important to you to know how the improvement of the world. This kind of book will bring you throughout new era of the positive effect. You can read the e-book on your own smart phone, so you can read that anywhere you want.

James Thrasher:

Reading can be called mind hangout, why? Because if you find yourself reading a book mainly book entitled Bioprocessing for Value-Added Products from Renewable Resources: New Technologies and Applications the mind will drift away through every dimension, wandering in each and every aspect that maybe not known for but surely can become your mind friends. Imaging each and every word written in a publication then become one application from conclusion and explanation that will maybe you never get just before. The Bioprocessing for Value-Added Products from Renewable Resources: New Technologies and Applications giving you another experience more than blown away your thoughts but also giving you useful info for your better life on this era. So now let us show you the relaxing pattern here is your body and mind is going to be pleased when you are finished reading it, like winning a game. Do you want to try this extraordinary wasting spare time activity?

Pablo Bussey:

Your reading sixth sense will not betray a person, why because this Bioprocessing for Value-Added Products from Renewable Resources: New Technologies and Applications publication written by well-known writer whose to say well how to make book that could be understood by anyone who all read the book. Written throughout good manner for you, dripping every ideas and composing skill only for eliminate your own personal hunger then you still question Bioprocessing for Value-Added Products from Renewable Resources: New Technologies and Applications as good book not merely by the cover but also through the

content. This is one book that can break don't assess book by its include, so do you still needing yet another sixth sense to pick this kind of!? Oh come on your studying sixth sense already alerted you so why you have to listening to one more sixth sense.
